Re: Semiannual Report of Groundwater Due Diligence
Solutia Inc., W. G. Krummrich Plant, Sauget, IL

Dear Mr. Bardo:

This letter and its enclosure comprise the current subject report, in partial fulfillment of one of the "Institutional Controls" elements of the February 26, 2008, "Final Decision" for the W. G. Krummrich Plant, under which Solutia Inc. ("Solutia") is to:

- annually notify U.S. EPA that municipal groundwater protection ordinances remain in place; and
- semiannually report on related due diligence, including:
 - publicizing existence of groundwater use restrictions;
 - conducting a semiannual review of available state and local records pertaining to groundwater well installation permits and construction dewatering permits; and
 - documenting the presence of any wells within 0.5 mile of Solutia's contaminant plume boundary and determining pumping activities at such wells.

If you have any questions or comments regarding this report, please contact me at (314) 674-3312 or gmrina@solutia.com

Sincerely,

A handwritten signature in cursive script, appearing to read "Gerald M. Rinaldi".

**RE: MARCH 2012 SEMI-ANNUAL REPORT
DUE DILIGENCE WITHIN A 0.5-MILE RADIUS OF
GROUNDWATER CONTAMINANT PLUME BOUNDARY
SOLUTIA INC., SAUGET, ILLINOIS**

Dear Mr. Rinaldi:

Golder Associates Inc. (Golder) is pleased to provide the March 2012 semiannual report on due diligence within a 0.5-mile radius of Solutia's groundwater contaminant plume boundary (search radius). According to the Final Decision, issued for Solutia Inc.'s (Solutia) W. G. Krummrich Plant by the United States Environmental Protection Agency Region V (USEPA) pursuant to the Resource Conservation and Recovery Act (Final Decision), required due diligence activities include:

- Publicizing the existence of local groundwater use restrictions
- Conducting a semiannual review of available state and local records regarding groundwater well installation permits and construction dewatering permits
- Documenting the presence of any wells within the search radius and determining pumping activities of such wells

Solutia's contaminant plume boundary is defined by the limiting flow lines downgradient of the former Chlorobenzene Process and Benzene Storage Areas as depicted in Figure 1 in the *Long-Term Monitoring Program Work Plan, W.G. Krummrich Facility, Sauget, Illinois*, dated April 11, 2008. Solutia's approximate contaminant plume boundary and 0.5-mile search radius are shown on the attached Figure 1.

1.0 PUBLICIZING THE EXISTENCE OF LOCAL GROUNDWATER USE RESTRICTIONS

Golder contacted the offices of the Clerks for the Villages of Cahokia and Sauget and the City of East St. Louis to confirm the existence of groundwater use restrictions. The Village of Sauget confirmed Ordinance No. 99-5, as amended by Ordinance No. 05-03, is in effect. The Village of Cahokia confirmed Ordinance Nos. 981, 05-1086 and 2008-1119 are in effect. The City of East St. Louis City Clerk's office confirmed Ordinance No. 97-10066 is in effect. Copies of Sauget's, Cahokia's and East St. Louis's ordinances are provided as Attachment A.

A public notice stating the existence of the groundwater use restrictions and providing instructions for obtaining further information was posted in the Belleville News-Democrat on February 15, 2012. The Certificate of Publication is provided as Attachment B.

2.0 GROUNDWATER WELL INSTALLATION PERMITS

Public and private groundwater well installation permit applications are required to be submitted to the Illinois Department of Health (ILDH). Permit information is compiled and maintained by the Illinois State

Water Survey (ISWS) in a publicly available database. A query of the database by section, township and range within the search radius was performed. The Illinois State Geological Survey (ISGS) also maintains a database of all geological borings, including groundwater wells, which was reviewed and compared with the ISWS database. However, the ISGS database is compiled from the records provided by the ISWS and is considered less inclusive.

A total of 164 private groundwater wells are listed within the search radius. No public wells were listed within the search radius. Information provided in the databases for these private wells is summarized in Table 1. According to the databases, at least 59 of the 164 wells are listed as abandoned. Of the 164 wells, 110 are listed as owned by Monsanto, Sauget Area 2, or Solutia (subject property). Twenty-six (26) monitoring wells owned by Solutia (subject property) and designated as "SOLUTIA/ WG KRUMMRICH FACILITY #SVE-___", were added to the ISWS database since September 2011 and are included on the attached Table 1. According to information in the database, the 26 monitoring wells were completed in February of 2009 and are listed as sealed and abandoned in August, 2011.

3.0 CONSTRUCTION DEWATERING PERMITS

The St. Clair County Building and Zoning Department and the offices of the Clerks of the City of East St. Louis and the Villages of Sauget and Cahokia do not require construction dewatering permits.

4.0 GROUNDWATER WELLS WITHIN THE SEARCH RADIUS

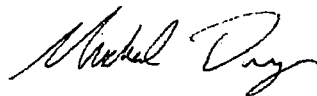

Database entries for groundwater wells are summarized in Table 1 and approximate locations are presented in Figure 1. Facilities with groundwater wells listed in the databases are referenced on Figure 1 with the "Fig. ID" provided in Table 1. Latitude and longitude data, where included in the database, were used to verify the well locations. Otherwise, the well locations are represented at the facility location, if identified.

A total of 18 industrial or commercial facilities (including the subject property) were listed on the ISWS and ISGS databases within the search radius. Pumping data for private groundwater wells, compiled annually by the ISWS, is confidential unless the facility grants a specific release. These facilities were not contacted to verify the status and pumping activities of the listed groundwater wells.

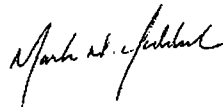

Please contact us if you have any questions.

Sincerely,
